

# ACT IN SPACE 2018

## Polish National Final Competitions in Warsaw

### *Report*

**Date:** June 8, 2018

**Venue:** Brain Embassy (Aleje Jerozolimskie 181B), Warsaw, Poland.

Two teams were selected in local ActInSpace 2018 competitions in Cracow in May 2018: **SpaceFolks** with the project **GoWild** and **OneOn** with the project **Vinum 4.0**. Both project were related to the BalticSatApps challenge in published at the ActInSpace 2018 webpage.

GoWild is the mobile application for generating the new hiking routes in the mountains. The application utilizes the satellite data from the Copernicus platform for the definition of the level of the route. The members of the GoWild team are Katarzyna Adamek and Marcin Adamczyk.

Vinum 4.0 is the project dedicated to the vinerage owners. It supports the comprehensive monitoring if growth of the grapes, weather conditions. The application uses the satellite data from the Copernicus platform along with the data generated by the sensors developed by the Vinum 4.0 team. The team members are: Aneta Rudzik and Katarzyna Lenart.

There were two other teams from Warsaw wat the competitions attendees list: Scorpio team from Wroclaw University and Technology and PAFA Team – both teams did not selected BSA challenge.

The winner of the Polish National Competition was PAFA TEAM. This team was qualified for the International Final Competition in Toulouse (France). Two BSA teams- OneOn and SpaceFolks won the trip to the final as a special award for the preparation of the best BSA-related projects at local hackathon in Cracow in May 2018.
